SUMMARY

Frontend developer with 4+ years of experience building production web applications with React, Next.js, and TypeScript. Currently the sole frontend engineer across three products at a fast-moving tech company, owning UI architecture and design systems end to end, while contributing part-time to an AI hiring SaaS platform using React Router v7. Comfortable working closely with backend, product, and design teams in Agile settings.

WORK EXPERIENCE

Frontend Developer | Undisclosed company | *Oct 2025 - Present*

- Sole frontend engineer responsible for three products — Knowledge Chat, IDP (Intelligent Document Processing), and Credit Scoring — owning UI architecture end to end.
- Built and maintained the shared design system and reusable UI component library (shadcn/ui, Tailwind CSS) used across all three products.
- Developed application UIs with **React, Next.js (App Router), TypeScript, TanStack Query**, coordinating closely with backend, product, and QA to ship maintainable, well-tested features.
- Set up application observability (OpenTelemetry SDK, OpenObserve, Pino structured logging) covering distributed tracing, RUM, and custom product metrics; presented findings to the wider engineering team.
- Integrated Qdrant vector database for a knowledge-base/RAG feature, including document ingestion, filtered search, and cleanup workflows.

Frontend Developer (Part-time) | PT. Medira Talenta Asia | *Jun 2025 - Present*

- Built the frontend for Medira, a job & internship recruitment platform connecting candidates with trusted companies, using React Router v7 in framework mode.
- Contributed to Medira SaaS, an AI hiring platform that streamlines recruitment through automation and intelligence — enabling organizations to build customized, autonomous video assessment workflows powered by enterprise-grade AI.
- Implemented core routing, data loading, and authentication/login flows for the platform (app.medira.id).
- Worked as an independent part-time contributor, delivering features alongside a full-time role.

Frontend Web Developer | PT. Infomedia Nusantara | *Oct 2022 - Oct 2025*

- Translated UI/UX designs into responsive, production-ready web interfaces using React, TypeScript, Tailwind CSS, and Ant Design.
- Built scalable, interactive applications with React and TypeScript, managing global state with Redux and Zustand.
- Followed Agile/Scrum practices, collaborating closely with backend developers and UI/UX designers to keep delivery on schedule.
- Integrated and consumed REST APIs to ensure reliable end-to-end data flow across applications.

Frontend Web Developer | PUTI Telkom University | *Mar 2022 - Oct 2022*

- Collaborated with a System Analyst, Technical Writer, and Database Manager to build and maintain a production website within scope and timeline.
- Developed features and fixed bugs on a web application built with CodeIgniter 3 (PHP), using SVN for version control.

Frontend Web Developer (Freelance) | Upana Studio | *Feb 2022 - Feb 2023*

- Implemented UI/UX designs into a React + TypeScript website with Redux for global state management.
- Worked directly with a backend developer and UI/UX designer under Agile/Scrum, from REST API integration through deployment.

Frontend Web Developer Intern | Kampus Merdeka x Amoeba Telkom | *Sep 2021 - Feb 2022*

- Implemented UI/UX designs and led the adoption of Redux for global state management, improving app scalability.
- Collaborated with backend developers, system analysts, and designers to integrate RESTful APIs and deploy the product.

Frontend Web Developer Intern | Vutura.io | *Jun 2020 - Aug 2020*

- Built a website and chat widget using jQuery, JavaScript, Vue.js, Materialize, and Vuetify.
- Worked within an Agile/Scrum team alongside Backend, QA, and UI/UX to hit delivery milestones ahead of schedule.

EDUCATION

B.S. in Informatics — GPA 3.24 | Telkom University | *Aug 2017 - Sep 2021*

- Relevant coursework: Data Analysis, Computer Programming, Data Mining & Machine Learning, Computer Vision, Web Programming.
- Organization: Head of KOMINFO, KBMS (2020-2021); Staff of KOMINFO, KBMS (2017-2018); Member, Digistar Club by Telkom Indonesia (2021-Present).
- Classification Of Dried Clove Flower Quality Using Convolutional Neural Network - https://ieeexplore.ieee.org/document/9650199

SKILLS

Frontend: React, Next.js (App Router), React Native, Svelte, TypeScript, JavaScript, Redux, Zustand, TanStack Query/Table, Tailwind CSS, shadcn/ui, Material UI, Chakra UI, Ant Design, NativeBase, CSS/SCSS

Backend: Node.js, Express.js, NestJS, FastAPI (Python), TypeORM, Prisma ORM, Drizzle ORM, BullMQ

Data & Infra: PostgreSQL, MySQL, Qdrant (vector DB), GCP, Vercel, Netlify, Railway, Jenkins, Docker/Containers, Minio, Redis

Testing & Tooling: Playwright (E2E), Storybook (component documentation), Git, Code Review, Design Patterns

Observability: OpenTelemetry, OpenObserve, Pino

Practices: Agile & Scrum, Design Systems, UI Design

Soft Skills: Communication, Critical Thinking, Teamwork, Problem Solving, Team Leadership, Analytical Thinking, Willingness to Learn

CERTIFICATIONS

- Google IT Automation with Python — Coursera
